Amendments to the Claims:

Please amend the claims as instructed in the marked-up version of the Listing of Claims presented below. This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims

1. (Currently amended) An anti-soiling detergent composition, containing:
 - (A) 0.05 to 10 mass% of a polyetheramide-modified organopolysiloxane ~~and/or amino-modified organopolysiloxane~~;
 - (B) 0.1 to 30 mass% of at least one type of surfactant selected from nonionic surfactants, amphoteric surfactants, and cationic surfactants;
 - (C) 0.1 to 20 mass% of a metal chelating agent; and
 - (D) water.
2. (Original) The anti-soiling detergent composition according to claim 1, containing (E) 0.01 to 5 mass% of a thickener in addition to components (A) to (D).
3. (Previously presented) The anti-soiling detergent composition according to claim 1, containing (F) 0.1 to 20 mass% of a water-soluble solvent in addition to the above components.
4. (Canceled)
5. (Currently amended) The anti-soiling detergent composition according to claim [[4]] 1, wherein the polyetheramide-modified organopolysiloxane of component (A) is a polyetheramide-modified organopolysiloxane expressed by average compositional formula (1)

$$R^1_a R^2_b Q^1_c Q^2_d SiO_{(4-a-b-c-d)/2} \quad (1)$$

Serial No. 10/532,321
 Examiner: Charles L. Boyer
 Art Unit: 1751
 Page 3 of 11

Atty. Docket No.: JD-249-US

(where a and d are zeros or positive numbers; b and c are positive numbers such that $1.9 \leq a + b + c + d \leq 2.2$; R^1 is a hydrogen atom, a hydroxyl group, or a substituted or unsubstituted monovalent hydrocarbon group with 1 to 6 carbon atoms; R^2 is a monovalent hydrocarbon group with 1 to 6 carbon atoms; Q^1 is a group expressed by general formula (2) or (3)

[Chemical Formula 1]

R^3 and R^5 are divalent hydrocarbon groups with 2 to 18 carbon atoms; R^4 and R^6 are hydrogen atoms or monovalent hydrocarbon groups with 1 to 6 carbon atoms; X is a group expressed by general formula (4)

e and f are each 0 or 1; g and h are zeros or positive integers of 1 or greater; R^7 is a divalent hydrocarbon group with 2 to 18 carbon atoms; R^8 is a divalent hydrocarbon group with 3 to 10 carbon atoms; Y is a hydrogen atom, a monovalent hydrocarbon group with 1 to 18 carbon atoms, an acyl group, or an isocyanic acid group; Q^2 is a group expressed by general formula (5)

i and j are each 0 or 1; k is a positive integer of 1 or greater; m is zero or a positive integer of 1 or greater; R^9 is a divalent hydrocarbon group with 2 to 18 carbon atoms; R^{10} is a divalent hydrocarbon group with 3 to 10 carbon atoms; and Z is a hydrogen atom, a monovalent hydrocarbon group with 1 to 18 carbon atoms, an acyl group, or an isocyanic acid group; however d and g cannot both be zero at the same time).

6. (Currently amended) The anti-soiling detergent composition according to claim [[4]] 1, wherein the polyetheramide-modified organopolysiloxane of component (A) is a polyetheramide-modified organopolysiloxane expressed by average compositional formula (6)

(where a and d are zeros or positive numbers; b , c , and $e1$ are positive numbers such that $1.9 \leq a + b + c + d + e1 \leq 2.2$; R^1 is a hydrogen atom, a hydroxyl group, or a substituted or unsubstituted monovalent hydrocarbon group with 1 to 6 carbon atoms; R^2 is a monovalent hydrocarbon group with 1 to 6 carbon atoms; Q^1 is a group expressed by general formula (2) or (3)

[Chemical Formula 2]

R^3 and R^5 are divalent hydrocarbon groups with 2 to 18 carbon atoms; R^4 and R^6 are hydrogen atoms or monovalent hydrocarbon groups with 1 to 6 carbon atoms; X is a group expressed by general formula (4)

e and f are each 0 or 1; g and h are zeros or positive integers of 1 or greater; R^7 is a divalent hydrocarbon group with 2 to 18 carbon atoms; R^8 is a divalent hydrocarbon group with 3 to 10 carbon atoms; Y is a hydrogen atom, a monovalent hydrocarbon group with 1 to 18 carbon atoms, an acyl group, or an isocyanic acid group; Q^2 is a group expressed by general formula (5)

i and j are each 0 or 1; k is a positive integer of 1 or greater; m is zero or a positive integer of 1 or greater; R^9 is a divalent hydrocarbon group with 2 to 18 carbon atoms; R^{10} is a divalent hydrocarbon group with 3 to 10 carbon atoms; and Z is a hydrogen atom, a monovalent hydrocarbon group with 1 to 18 carbon atoms, an acyl group, or an isocyanic acid group; d and g cannot both be zero at the same time; Q^3 is a group expressed by general formula (7) or (8)

[Chemical Formula 3]

Atty. Docket No.: JD-249-US

R^3 and R^5 are divalent hydrocarbon groups with 2 to 18 carbon atoms; and R^4 and R^6 are hydrogen atoms or monovalent hydrocarbon groups with 1 to 6 carbon atoms).

7. (Previously presented) The anti-soiling detergent composition according to claim 2, wherein the thickener of component (E) is at least one compound selected from among thickening polysaccharides, carboxyvinyl polymers, crosslinked polyacrylic acids, and salts thereof.

8. (Previously presented) The anti-soiling detergent composition according to claim 3, wherein the water-soluble solvent of component (F) is at least one compound selected from among alcohols, glycol ethers, and terpene-based hydrocarbon solvents.

9. (Previously presented) The anti-soiling detergent composition according to claim 1, wherein the anti-soiling detergent composition is used in hard-surface applications.

10. (Previously presented) The anti-soiling detergent composition according to claim 1, wherein the anti-soiling detergent composition is used in applications involving restrooms, washstands, baths, and other damp locations.

11. (Previously presented) The anti-soiling detergent composition according to claim 2, containing (F) 0.1 to 20 mass% of a water-soluble solvent in addition to the above components.

12. (Canceled)

13. (Canceled)

14. (Currently amended) The anti-soiling detergent composition according to claim [[3]] 11, wherein the thickener of component (E) is at least one compound selected from among thickening polysaccharides, carboxyvinyl polymers, crosslinked polyacrylic acids, and salts thereof.

15. (Canceled)

16. (Canceled)

17. (Canceled)

18. (Currently amended) The anti-soiling detergent composition according to claim [[4]] 14, wherein the water-soluble solvent of component (F) is at least one compound selected from among alcohols, glycol ethers, and terpene-based hydrocarbon solvents.

19. (Canceled)

20. (Canceled)

21. (Canceled)

22. (Previously presented) The anti-soiling detergent composition according to claim 2, wherein the anti-soiling detergent composition is used in hard-surface applications.

23. (Previously presented) The anti-soiling detergent composition according to claim 3, wherein the anti-soiling detergent composition is used in hard-surface applications.

24. (Currently amended) The anti-soiling detergent composition according to claim [[4]] 14, wherein the anti-soiling detergent composition is used in hard-surface applications.

Atty. Docket No.: JD-249-US

25. (Previously presented) The anti-soiling detergent composition according to a claim 5, wherein the anti-soiling detergent composition is used in hard-surface applications.

26. (Previously presented) The anti-soiling detergent composition according to claim 6, wherein the anti-soiling detergent composition is used in hard-surface applications.

27. (Previously presented) The anti-soiling detergent composition according to claim 7, wherein the anti-soiling detergent composition is used in hard-surface applications.

28. (Previously presented) The anti-soiling detergent composition according to claim 8, wherein the anti-soiling detergent composition is used in hard-surface applications.

29. (Previously presented) The anti-soiling detergent composition according to claim 2, wherein the anti-soiling detergent composition is used in applications involving restrooms, washstands, baths, and other damp locations.

30. (Previously presented) The anti-soiling detergent composition according to claim 3, wherein the anti-soiling detergent composition is used in applications involving restrooms, washstands, baths, and other damp locations.

31. (Currently amended) The anti-soiling detergent composition according to claim [[4]] 14, wherein the anti-soiling detergent composition is used in applications involving restrooms, washstands, baths, and other damp locations.

32. (Previously presented) The anti-soiling detergent composition according to claim 5, wherein the anti-soiling detergent composition is used in applications involving restrooms, washstands, baths, and other damp locations.

Atty. Docket No.: JD-249-US

33. (Previously presented) The anti-soiling detergent composition according to claim 6, wherein the anti-soiling detergent composition is used in applications involving restrooms, washstands, baths, and other damp locations.

34. (Previously presented) The anti-soiling detergent composition according to claim 7, wherein the anti-soiling detergent composition is used in applications involving restrooms, washstands, baths, and other damp locations.

35. (Previously presented) The anti-soiling detergent composition according to claim 8, wherein the anti-soiling detergent composition is used in applications involving restrooms, washstands, baths, and other damp locations.

36. (Canceled)

37. (New) The anti-soiling detergent composition according to claim 5, containing (E) 0.01 to 5 mass% of a thickener in addition to components (A) to (D).

38. (New) The anti-soiling detergent composition according to claim 37, containing (F) 0.1 to 20 mass% of a water-soluble solvent in addition to the above components.

39. (New) The anti-soiling detergent composition according to claim 38, wherein the thickener of component (E) is at least one compound selected from among thickening polysaccharides, carboxyvinyl polymers, crosslinked polyacrylic acids, and salts thereof, and wherein the water-soluble solvent of component (F) is at least one compound selected from among alcohols, glycol ethers, and terpene-based hydrocarbon solvents.

40. (New) The anti-soiling detergent composition according to claim 6, containing (E) 0.01 to 5 mass% of a thickener in addition to components (A) to (D).

Atty. Docket No.: JD-249-US

41. (New) The anti-soiling detergent composition according to claim 40, containing (F) 0.1 to 20 mass% of a water-soluble solvent in addition to the above components.

39. (New) The anti-soiling detergent composition according to claim 41, wherein the thickener of component (E) is at least one compound selected from among thickening polysaccharides, carboxyvinyl polymers, crosslinked polyacrylic acids, and salts thereof, and wherein the water-soluble solvent of component (F) is at least one compound selected from among alcohols, glycol ethers, and terpene-based hydrocarbon solvents.
